Structure of Molecular
Aggregates in Liquids
And Their Manifestation
in Spectra of Raman Scattering

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | And Their Manifestation in Spectra of Raman Scattering | The monograph contains discussion of experimental and theoretical studies of intermolecular interactions and aggregation of molecules in the liquid state. Particular attention is paid to the intermolecular hydrogen bond and aggregation of molecules in liquids and solutions through this interaction. Problems of the formation of molecular aggregates were solved using Raman spectroscopy and quantum-chemical calculations based on the Gaussian -98 software. The material is...
