effects on Yield and
Nutrient quality of Maize**
Pre and Post harvest Soil AB-DTPA extractable P, Zn,
Soil available SO₄-S, Leaf P concentration, plants
density, Maize

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Pre and Post harvest Soil AB-DTPA extractable P, Zn, Soil available SO₄-S, Leaf P concentration, plants density, Maize | Maize is the third important cereal crop in Pakistan after wheat and paddy. It is cultivated widely in the temperate, tropical and sub-tropical areas in the world. But, its function adversely affected by intense temperature and less humidity environments, gives rise to interfere in efficient pollination and resulted in failure in proper grain...
