Apart from these opportunities for recording greater diagnostic detail, the direct compatibility with ICD-10 facilitates comparisons between statistics compiled according to ICD-NA and national morbidity and mortality statistics compiled according to ICD-10. These features enhance the flexibility of ICD-NA, making it suitable for use in morbidity statistics, hospital record indexing, and epidemiological research, by government and other health agencies collecting statistical data under relatively few main headings, or by individual physicians and researchers requiring a convenient tool for indexing their clinical and...
