Pediatric Neurology: A Case-Based Review is the first pediatric neurology review book written specifically for neurology residents preparing for the oral boards. The book presents sixty cases with discussions structured according to the neurology oral boards format: localization of neurologic findings; differential diagnosis and most likely diagnosis; diagnostic workup; and patient management. The cases will help readers lay a foundation of knowledge in pediatric neurology and develop an organized approach to clinical decision-making. An introduction explains in detail what to expect on the examination and gives helpful hints on preparing for and taking the exam.
