

## A Dictionary of Chemical Solubilities; Inorganic

Filesize: 2.28 MB

### ***Reviews***

*It is one of my personal favorite books. This is certainly for anyone who states there has not been a worthwhile study. I found out this ebook from my father and he advised this pdf to learn.*

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: . we have an intermittent passivity. If a part of a piece of iron is immersed in strong acid, the whole of it is made passive. This is explained by the N<sub>2</sub> spreading over the whole surface by capillarity. The passivity ceases when the Fe is placed in dil. acid, after a longer or shorter time, according to the dilution of the acid, --when the acid has sp. gr. = 1-30, after 11 days 1-28 5, 1-26 32 hours 1-16 12 Iron may also be made passive by long standing in N<sub>2</sub> gas under pressure. (Varenne, C. R. 90. 998.) Fe is made passive by a coating of Fe<sub>3</sub>O<sub>4</sub>, not by N<sub>2</sub>. (Schonbein, Pogg. 39. 342.) (Beetz, Pogg. 67. 286.) (Ramann, B. 14. 1430.) Passivity may also be caused by NH<sub>4</sub>N<sub>3</sub> + Aq, ammoniacal AgN<sub>3</sub> + Aq, Fe(N<sub>3</sub>)<sub>3</sub>, Fe(N<sub>3</sub>)<sub>2</sub>, Al(N<sub>3</sub>)<sub>3</sub>, Co(N<sub>3</sub>)<sub>2</sub>, Ni(N<sub>3</sub>)<sub>2</sub>, etc. + Aq instead of HN<sub>3</sub> + Aq. (Ramann, B. 14. 1933.) Hardly attacked by either dil. or conc. acids when they are under high pressure. (Cailletet, C. R. 68. 395.) Iron is dissolved by HN<sub>3</sub> + Aq, even when very cone., but no gas is evolved and the process is very siow. HN<sub>3</sub> + Aq of the following sp. gr. dissolves the following amts. from strips of pure Fe. (Gautier and Charpy, C. R. 113. 1451.) Not attacked by alkalies. Sol. in NaOH + Aq (34 ) when air is blown through the liquid. (Zirnite, Ch. Ztg. 12. 355.) NaOH + Aq attacks...
