

Measurements of Heat and Combustion Products in Reduced-Scale Ventilation-Limited Compartment Fires

Filesize: 7.59 MB

Reviews

It is great and fantastic. Better then never, though i am quite late in start reading this one. Its been written in an extremely simple way and is particularly only right after i finished reading this ebook where actually changed me, affect the way i really believe.

MEASUREMENTS OF HEAT AND COMBUSTION PRODUCTS IN REDUCED-SCALE VENTILATION-LIMITED COMPARTMENT FIRES

[DOWNLOAD](#)

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 156 pages. Dimensions: 11.0in. x 8.5in. x 0.4in. A series of new reduced-scale compartment fire experiments were conducted, which included local measurements of temperature and species composition. The measurements are unique to the compartment fire literature. By design, the experiments provided a comprehensive and quantitative assessment of major and minor carbonaceous gaseous species and soot at two locations in the upper layer of fire in a 25 scale International Organization for Standards (ISO) 9705 room. The enclosure defined in the international standard ISO 9705 Full-scale room test for surface products 1 is an important structure in which to conduct fire research. Many dozens of research projects and journal articles have focused on this enclosure and the standard describing its use. It is a common reference point for studies of many fire-related phenomena as well as fire modeling efforts. This item ships from La Vergne, TN. Paperback.
