By Francis B. Crocker

Forgotten Books. Paperback. Condition: New. This item is printed on demand. 468 pages. Dimensions: 9.0in. x 6.0in. x 0.9in. Excerpt from Electric Lighting, Vol. 1: A Practical Exposition of the Art for the Use of Engineers, Students, and Others Interested in the Installation or Operation of Electrical Plants; The Generating Plant. The first edition of this book appeared in 1896, and four editions containing revisions have been published since. The present edition has been practically rewritten, bringing the various branches of the subject thoroughly up to date. The original arrangement of topics and the treatment of fundamental facts are retained, but the earlier types of apparatus have been replaced by the latest examples. Much new matter relating to recent developments in station design, steam-turbines, gas-engines, direct-connected generators, storage batteries, etc., has been introduced. Particular care has been exercised in eliminating the dead wood consisting of antiquated illustrations and statements, which are too often left in revised editions of technical works. This book has been used for eight years as a text-book in a number of engineering schools, and as a result of this experience the new edition is better adapted to its purpose. It is also intended as a handbook for...
