

# Principles of Modern Geometry; With Numerous Applications to Plane and Spherical Figures and an Appendix Containing Questions for Exercise Intended Chiefly for the Use of Junior Students

Filesize: 2.66 MB

## **Reviews**

*It is just one of the best ebooks. I was able to comprehend every thing out of this composed e pdf. It is extremely difficult to leave it before concluding, once you begin to read the book.*

To read **Principles of Modern Geometry; With Numerous Applications to Plane and Spherical Figures and an Appendix Containing Questions for Exercise Intended Chiefly for the Use of Junior Students** eBook, you should access the web link beneath and download the file or have access to additional information which might be highly relevant to PRINCIPLES OF MODERN GEOMETRY; WITH NUMEROUS APPLICATIONS TO PLANE AND SPHERICAL FIGURES AND AN APPENDIX CONTAINING QUESTIONS FOR EXERCISE INTENDED CHIEFLY FOR THE USE OF JUNIOR STUDENTS ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1862 Excerpt: .in the preceding examples are of the class called by Poncelet graphical, as referring only to the relative positions of points and lines. We shall now give By the term arc we shall irt general imply an arc of a gnat circle. Q some which include the magnitude of lines, and belong to the class which he calls metrical. 1. If from the angles of a spherical triangle three arcs be drawn meeting in a point, and cutting the opposite sides, the products of the sines of the alternate segments of the sides are equal. Take the projection of the spherical figure on any plane, and we shall have a plane triangle with three right lines drawn from its angles meeting in a point, and therefore (Art. 9, Lemma 1) the products of the alternate segments of the sides are equalWe have, then, an equation of the kind mentioned in Article 110, the number k being in the present instance 1. The Proposition is evident, therefore, from the second part of that Article. A direct proof of this Proposition will be found in Art. 125. 2. If a great circle cut the three sides of a spherical triangle, the products of the sines of the alternate segments of the sides are equal. This follows from Art. 9, Lemma 2, by Art. 110, just as before. This Proposition also is proved directly in Art. 125. 3. Let PQRS be a parallelogram, and OM, LN parallel to the...
