By Debasis Sengupta, S.Rao Jammalamadaka

World Scientific Publishing Co Pte Ltd, Singapore, 2003. Hardback. Book Condition: New. 231 x 150 mm. Language: English . Brand New Book. This text aims to provide a clear and deep understanding of the general linear model using simple statistical ideas. Elegant geometric arguments are also invoked as needed and a review of vector spaces and matrices is provided to make the treatment self-contained. Complex, matrix-algebraic methods, such as those used in the rank-deficient case, are replaced by statistical proofs that are more transparent and that show the parallels with the simple linear model.
