

## Retinopathy of prematurity in Nepal

By Adhikari, Srijana

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Retinopathy of prematurity is emerging as an important cause of childhood ocular morbidity in developing country like Nepal. We carried out a prospective cohort study to find out incidence and severity of ROP in Nepalese children. This study also helped us set our own criteria for screening premature babies at risk. ROP was found in 25.5% of children out of which 5.45 % had Threshold disease. Low birth weight and gestational age were significantly associated with severity of ROP. Oxygen was an independent risk factor. This book gives an insight on retinopathy of prematurity with special focus on its situation in Nepal. All babies with gestational age of 34 wks or less and weighing 1500 gram or less should undergo screening examination for retinopathy of prematurity. Raising awareness among the pediatricians and the care givers about timely detection and intervention of the disease is crucial in avoiding childhood blindness due to ROP. | Format: Paperback | Language/Sprache: english | 68 pp.

### Reviews

*This book might be well worth a study, and much better than other. Indeed, it can be perform, continue to an amazing and interesting literature. I realized this publication from my i and dad suggested this book to find out.*

-- **Dejuan Rippin**

*This book will be worth getting. Better then never, though i am quite late in start reading this one. Its been written in an extremely basic way which is only right after i finished reading this book through which actually altered me, alter the way i believe.*

-- **Mr. Enrico Lesch**
