## THE PRINCIPLES UNDERLYING RADIO COMMUNICATION

To get **The Principles Underlying Radio Communication** eBook, remember to refer to the web link beneath and save the file or have access to additional information that are highly relevant to THE PRINCIPLES UNDERLYING RADIO COMMUNICATION book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 192 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 edition. Excerpt: . . . magnetic fields radiated in transmitting from a vertical wire antenna are shown in Fig. 159, page 297. Most of the other types of antennas ordinarily used have directional properties, at least to some extent. The inverted L antenna has a considerable directional effect. An inverted L antenna with a long, low top (Fig. 173-C), such as are often found at large stations, has a marked directional effect, as shown by the directional characteristic in Fig. 173-0. The length of the line l drawn from the central point A in any direction indicates the strength of the current received from a transmitting station located in that direction. It will be noted that the inverted L transmits and receives best in the direction opposite to that in which the antenna top points. The multiple-tuned antenna, as shown in Fig. 173-A, has a considerable directional effect. Ground antennas (see Sec. 150-a) have marked directional characteristics. The most important type of directional antenna is, however, the coil antenna, described in Sections 151-152. Particular kinds of directional effects can be secured by combining different kinds of directional antennas. The directional properties are most often made use of for receiving, but are also used for transmitting. In transmitting, a considerable part of the energy may be concentrated in a particular direction by the use of a directional antenna, and the range of a transmitting station thus increased and interference decreased. Directive...
