UNIVERSALIST QUARTERLY AND GENERAL REVIEW VOLUME 9-10

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1852 edition. Excerpt: .from the sun is, in round numbers (which I shall mostly employ) 100 millions of miles; which is of course the radius or semi-diameter of its orbit. This orbit, therefore, reaches through a circuit of 600 millions of miles, along which the earth passes at the rate of 70,000 miles an hour. And we are at this moment more than 35,000 miles distant from the point in space where we were thirty minutes ago. We have actually travelled 35,000 miles, beside being carried by the diurnal motion of the earth 500 miles further east than we were half an hour ago! It is difficult to feel the reality of this, and yet it is as certain as figures. Let this be the starting point, and from it let us mount over the next three or four rounds in the shining ladder by which we rise out of our little solar system, into the infinite abysses beyond. The planet Jupiter is 1400 times larger than our earth, and the sun 1400 thousand times larger. Saturn rejoices in seven moons, and in the additional glory of two magnificent rings belting her heavens with a splendor inconceivable to us, who are favored only with the light of one humble little moon for half the time. And this last body, with its stupendous accompaniments of moons and rings, is rushing through space at the rate of more than 22,000 miles an hour! Jupiter is more than 260,000 miles...
