# After the Software Wars

By Keith Cary Curtis

Paperback. Condition: New. 304 pages. Given the technology thats already available, we should have cars that drive us around, in absolute safety, while we lounge in the back and sip champagne. All we need is a video camera on the roof, plugged into a PC, right We have all the necessary hardware, and have had it for years, but dont yet have robot-driven cars because we dont have the software. This book explains how we can build better software and all get our own high-tech chauffeur. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.

Reviews

This pdf may be really worth a read, and superior to other. It generally does not price too much. Once you begin to read the book, it is extremely difficult to leave it before concluding.
-- Dylan Schaden

This book will be worth buying. Better then never, though i am quite late in start reading this one. You may like how the blogger compose this publication.
