GEOSPATIAL INTELLIGENCE SUPPORT TO JOINT OPERATIONS (JOINT PUBLICATION 2-03)

Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 134 pages. Dimensions: 11.0in. x 8.5in. x 0.3in. This publication provides doctrine for geospatial intelligence (GEOINT) support to joint operations. This publication discusses GEOINT roles, planning, coordination, production, dissemination, and existing architectures that support GEOINT and the geospatial information and services and intelligence officer in planning, execution, and assessment of the mission. Geospatial intelligence (GEOINT) supports joint forces in their ability to rapidly respond to threats around the world by providing geo-referenced visual and data products that serve as a foundation and common frame of reference for any joint operation. GEOINT is the exploitation and analysis of imagery and geospatial information to describe, assess, and visually depict physical features and geographically referenced activities on the Earth. GEOINT consists of imagery, imagery intelligence (IMINT), and geospatial information. Imagery: A likeness or presentation of any natural or manmade feature or related object or activity and the positional data acquired at the same time the likeness or representation was acquired, including products produced by space-based national intelligence reconnaissance systems, and likenesses or presentations produced by satellites, airborne platforms, unmanned aerial vehicles, or other similar means (except that such term does not include handheld or clandestine photography taken by or on behalf of human intelligence collection organizations). Imagery Intelligence: The technical, geographic, and intelligence information derived through the interpretation or analysis of imagery and collateral materials. Geospatial Information: Information that identifies the geographic location and characteristics of natural or constructed features and boundaries on the Earth, including: statistical data and information derived from, among other things, remote sensing, mapping, and surveying technologies; and mapping, charting, geodetic data, and related products. The term GEOINT encompasses both the standard, or traditional, and the specialized (integrated) capabilities of imagery, IMINT, and geospatial information. The full utility...
