

Beekeeping; A Discussion of the Life of the Honeybee and of the Production of Honey

By Everett Franklin Phillips

Theclassics.us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: .The diversity of conditions in this region is well shown in the accompanying map (Fig. 95), which was prepared by E. G. Baldwin, De Land, Florida, who has studied the beekeeping possibilities of his State quite thoroughly. It will be seen that the sources of nectar are quite distinct geographically. The geographical position of this State and the diversity of soil and climatic conditions strongly influence the growth of the honey plants. In this State two localities only a few miles apart may be quite unlike, when viewed from the standpoint of the beekeeper. This is also true in many other parts of the United States. (4) The semi-arid region of the south-west is located chiefly in the arid and semi-arid parts of Texas and Arizona and here too the honey plants are of somewhat restricted distribution. Among the plants which are important to...
