

Dan Holdsworth : Spatial Objects

By -

DISTANZ Verlag GmbH Jun 2016, 2016. Taschenbuch. Condition: Neu. Neuware - Dan Holdsworth (b. Welwyn Garden City, England, 1974; lives and works in London and Newcastle upon Tyne) creates large-scale photographs and digital art characterized by the use of traditional techniques and unusually long exposure times, and by radical abstractions of geography. 'Spatial Objects' is the result of Holdsworth's ongoing enquiry into contemporary photographic imaging processes and what he calls the 'surface interface of the image.' In computer science, spatial objects refer to values that exist within a specific place simultaneously in the real and the virtual spheres. The starting point for his Spatial Objects series is U.S. Geological Survey mapping data of the American West; it also draws on the vocabulary of Minimalist sculptural practices of the 1960s and 1970s. Going beyond the limits of representation, what one sees in these works are the edges and fragments of the pixel resolved within the geometry of the interface itself, transformed into structures of pure color and light. With an essay by Michele Robecchi. 120 pp. Englisch.
