Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Applying Height Growth and Site Index Curves for Inland Douglas-Fir Site index was defined to be the average total height of the three best site trees (per one-half acre) at an index age of 50 years at breast height. Because the length of time it takes a seedling to reach breast height may be strongly influenced by factors that are poorly related to site quality - such as animal damage, snow damage, and plant competition in the immediate vicinity of the seedling (Cochran 1979; Curtis 1964) - index age was located at breast height rather than the base of the tree. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
