

## Fetal Alcohol Spectrum Disorder

By Frederic P. Miller

Alphascript Publishing. Taschenbuch. Book Condition: Neu. Neuware - Fetal Alcohol Spectrum Disorders (FASD) describes a continuum of permanent birth defects caused by maternal consumption of alcohol during pregnancy, which includes, but is not limited to fetal alcohol syndrome (FAS). Over time, as it became apparent through research and clinical experience that a range of effects (including physical, behavioral, and cognitive) could arise from prenatal alcohol exposure, the term Fetal Alcohol Spectrum Disorders, or FASD, was developed to include Fetal alcohol syndrome (FAS) as well as other conditions resulting from prenatal alcohol exposure. There are a number of other subtypes with evolving nomenclature and definitions based on partial expressions of FAS, including Partial Fetal Alcohol Syndrome (PFAS), Alcohol-Related Neurodevelopmental Disorder (ARND), Alcohol-Related Birth Defects (ARBD), and Fetal Alcohol Effect (FAE). The term Fetal Alcohol Spectrum Disorders is not in itself a clinical diagnosis but describes the full range of disabilities that may result from prenatal alcohol exposure. 72 pp. Englisch.
