

## Theoretical Studies of Plasma-loaded Backward Wave Oscillator

Filesize: 7.26 MB

### **Reviews**

*These kinds of publication is everything and made me hunting ahead of time and more. I have got read through and i also am confident that i am going to gonna study yet again yet again later on. Its been printed in an extremely basic way in fact it is only after i finished reading this pdf in which in fact transformed me, alter the way i believe.*

## THEORETICAL STUDIES OF PLASMA-LOADED BACKWARD WAVE OSCILLATOR

To read **Theoretical Studies of Plasma-loaded Backward Wave Oscillator** eBook, make sure you refer to the web link beneath and download the file or gain access to other information that are have conjunction with THEORETICAL STUDIES OF PLASMA-LOADED BACKWARD WAVE OSCILLATOR ebook.

LAP Lambert Academic Publishing Jun 2012, 2012. Taschenbuch. Condition: Neu. Neuware - The linear theory of electromagnetic radiation from a plasma-loaded sinusoidally corrugated backward wave oscillator driven by intense relativistic electron beam has been developed and analyzed numerically as well as analytically. A beam-plasma waveguide model has been proposed and studied analytically with an aim to give a guideline to achieve an optimally designed backward wave oscillator in the X-band frequency range. First, the dispersion relation for TM<sub>01</sub> mode in absence of electron beam has been analyzed numerically for different structure-size parameters and plasma density. Then, developing the analytical dispersion relation, the effects of variation of structure parameters and plasma density on the spatial and temporal growth rates for TM<sub>01</sub> mode are investigated. Here, the analytical investigation, have been carried out by absolute instability analysis. It is observed that the variation of structure-size parameters and filled-plasma density modify the dispersion curves of the backward wave oscillator significantly and affect the beam-wave interaction frequency, the temporal and spatial growth rates and thus the signal strengths considerably. 88 pp. Englisch.
