

A Student's Workbook for Mathematics in Class 6: A Classroom 10-Pack with Teacher's Answer Booklet (Paperback)

Filesize: 8 MB

Reviews

A must buy book if you need to adding benefit. It is actually writer in basic phrases and never difficult to understand. I found out this book from my dad and i advised this publication to find out.

FLORIS BOOKS, United Kingdom, 2016. Paperback. Condition: New. Language: N/A. Brand New Book. Experienced maths teacher and consultant Jamie York believes that a love of learning comes through the teacher, so his books are committed to supporting teachers in developing their classroom skills and to fostering a love of maths in their students. Unlike conventional maths textbooks, his books are not full of fancy graphics and contrived ways to make maths fun. Rather, they: -- focus on the essentials, so teachers aren't overwhelmed by endless lists of required materials -- are genuinely interesting and challenging, sparking students enthusiasm for learning maths -- are developmentally appropriate to the age of the child, thereby encouraging inner mathematical awareness and thinking -- favour depth over superficiality, to avoid teaching blind procedures to solve meaningless problems. Note that the Floris Books editions of Jamie York's books have been completely revised for UK and European notation, language and metric systems. They are also suitable for use in South Africa, Australia and New Zealand. This student's workbook for Class 6 contains practice questions, with room for working, on all the topics a student needs to cover in Steiner-Waldorf Class 6 (age 12-13). The book includes: Review topics from previous years: multiplication, short and long division, fractions, decimals, measurement, unit cost, factors, and estimating. New topics for Class 6: casting out nines, exponents (powers), square roots, divisibility, formulas, the imperial and metric systems, converting decimals to fractions, and fractions to decimals, angle measure, percents, mean/median/mode, pie charts, line graphs, area and perimeter, business maths (discount, profit, etc.), ratios, rates (speed, wages), exchange rates and complex fractions. Mental maths: it is as important as ever for children to develop the ability to do calculations in their head. Each worksheet therefore begins with a section on...
