Excerpt from Du Pont s Artesian Well, Louisville, Kentucky: Report, Analysis, and Medical Properties of Its Water; With Remarks Upon the Nature of Artesian Wells The supply of water to Artesian Wells follows the how Artesian same law as other wells and springs, viz: The water rises Biliam sup in them to no greater height than that of the source. Iri this city the water rises in the ordinary wells to within forty feet of the surface, for the simple reason that the level of the basin of water in the gravel under the city is that depth beneath the surface. In Artesian Wells, that are considered successful, the boring is carried to such depth that some vein of water is encountered, having its connection with a source much higher than the surface of the Artesian Well, thus insuring a ?ow of water above the surface of the ground. It does not, however, always happen that the water in Artesian Wells rises to the surface. Many of the salt wells in Virginia, and elsewhere, are Of this character, and the water has to be pumped to the surface. There is a well of this last description, at Brighton, England, from which seven hundred gallons are pumped every minute.
