Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Dominion Medical Monthly and Ontario Medical Journal, 1906, Vol. 26 All preliminary discussions as to history, etiology and pathology lead up to the two great practical issues: how to prevent the disease and how to get rid of it. Prophylaxis - I am convinced that if we pay closer attention to prophylaxis there will be a prompt and a large percentage reduction in the cases of cystitis. Most of the cases seen nowa days, follow some ordinary surgical operation. A potent factor in the prophylaxis is the proper use of the catheter, which I may summarize as follows: A sterilized catheter; cleansing of the internal meatus before introduction. The general introduction of the catheter without touching the end introduced. The bladder must not be permitted to become distended. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
