This report describes the current status of the credit, summarizes its legislative history, discusses policy issues it raises, and describes legislation to modify and extend it. The report will be updated as warranted by legislative activity or other developments affecting the credit. The research credit (also known as the research and experimentation (RE) tax credit) has never been permanent. It expired at the end of 2014. A taxpayer may claim one of the first two and each of the other two, provided it meets the requirements for each. In essence, the research credit attempts to boost business investment in basic and applied research by reducing the after-tax cost of undertaking qualified research above a base amount, which in theory approximates the amount a company would invest in RD in the absence of the credit. As a result, the credit's effectiveness hinges on the sensitivity of the demand for this research to decreases in its cost. It is unclear from available studies how sensitive that demand actually is. While...
