

Research road map approaching thin films of TCO and TE semiconductors

Filesize: 8.79 MB

Reviews

Great e-book and helpful one. It usually fails to cost an excessive amount of. I discovered this publication from my dad and i encouraged this pdf to find out.

(Meagan Beahan)

LAP Lambert Academic Publishing Mai 2018, 2018. Taschenbuch. Condition: Neu. Neuware - Following the electropulsing induced phase transformations of alloys, systematic studies of thin films of Zn-Al alloys and semiconductors (Bi-Te, AZO-2 and AZO-5) were studied by using electropulsing. The detected multi-circulation of both phase transformations and preferred crystal orientation changes make it possible to monitor microstructural changes and to enhance physical and optical properties of the thin films. The research road map went through various aspects of the physical metallurgy, included thermal metallurgy, mechanical metallurgy, electro-metallurgy and electro-mechanical metallurgy, was scientifically logical and effective in studying and exploring application of the thin films of semiconductors. 68 pp. Englisch.
