Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *The Witmer Formboard and Cylinders as Tests for Children Two to Six Years of Age* The Witmer formboard and cylinders have been used for several years in the Psychological Clinic of the University of Pennsylvania as a means for measuring the abilities of children. Since no one knew how the ordinary child performed the test nor in how many seconds he could do it, comparisons were always made between children of like age who had appeared at the Clinic. In 1915, Dr. Herman H. Young obtained formboard records from a large number of normal children of school age in the public schools of Philadelphia, and a similar investigation for the cylinders has recently been made by Dr. Franklin C. Paschal. Not enough records have yet been collected for the standardization of either test, but a start in that direction has been made. Many children of less than six years are brought to the Clinic for examination. The use of either of these tests as testing or teaching material is of doubtful value if no one knows what is to be expected of normal children of from two to six years of age. The Clinic has held consistently that the child of four years should be able to do the formboard correctly, and the child of six years, the cylinders, but this view came as a result of clinical experience and not from the records of a large number of normal children. Through a study of records of normal children of kindergarten age or younger the present investigation aims to determine: 1. The age level of the tests; 2. Their clinical value; 3. The earliest passing...
