Reviews

This is actually the very best book i actually have read till now. This is for all those who statte that there was not a worth studying. Its been written in an remarkably straightforward way which is merely following i finished reading this publication by which in fact altered me, modify the way i believe.

(Mr. Jeramy Leuschke IV)

MACRO STRESS TESTING ON CREDIT RISK

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Of banking sectors in PIIGS countries | In this book the author stress tests the banking sectors of the PIIGS countries. He focuses in particular on modeling the credit risk and estimating the impact of changes in macroeconomic variables on the level of capital adequacy. He develops two scenarios - a baseline stress testing scenario and an adverse scenario. The results indicate that under both scenarios, the analyzed banking systems have some capital adequacy issues. He finds that the Portuguese banking sector is facing biggest capitalization problems. Number of undercapitalized banks under the adverse scenario is bigger than in baseline scenario for all the countries. Another finding which is common for all the countries is that large-sized privately owned banks are better capitalized than small and medium-sized ones. Last finding concerns ownership structure where the author found that all the state-owned banks are undercapitalized in both scenarios. | Format: Paperback | Language/Sprache: english | 132 gr | 220x150x5 mm | 76 pp.
