Excerpt from Prices of Illinois Farm Products, 1931-1934 Two important factors in recent price changes, factors which were not taken into consideration when forecasts of price conditions were made in 1930, were the change in monetary policy adopted by the federal government in 1933 and the severe drouth of 1934. Both factors operated to raise prices of farm products in manners de scribed in detail in subsequent parts of this bulletin. Just how much effect the monetary change will have on future prices remains a ques tion, altho the level will undoubtedly be substantially higher than it would have been had there been no such change.
