ON THE GEOMETRY OF DIFFUSION OPERATORS AND STOCHASTIC FLOWS

Springer-Verlag Gmbh Nov 1999, 1999. Taschenbuch. Book Condition: Neu. 235x155x13 mm. Neuware - Stochastic differential equations, and Hoermander form representations of diffusion operators, can determine a linear connection associated to the underlying (sub)-Riemannian structure. This is systematically described, together with its invariants, and then exploited to discuss qualitative properties of stochastic flows, and analysis on path spaces of compact manifolds with diffusion measures. This should be useful to stochastic analysts, especially those with interests in stochastic flows, infinite dimensional analysis,...
