Createspace Independent Publishing Platform, 2016. Paperback. Condition: New. Annotated. Language: English . Brand New Book ***** Print on Demand *****. Anticipations of the Reaction of Mechanical and Scientific Progress upon Human Life and Thought, generally known as Anticipations, was written by H.G. Wells at the age of 34. He later called the book, which became a bestseller, the keystone to the main arch of my work. His most recent biographer, however, calls the volume both the starting point and the lowest point in Wells's career as a social thinker. Taking the revolution in transport facilitated by the mechanical revolution as his point of departure, Wells told readers they were living through a reorganization of human society that would alter every dimension of life. An academic biographer has described the degree of accuracy of Wells's predictions as certainly phenomenal.
