

Modular Units (Paperback)

By D Kubert, S. Lang

Springer-Verlag New York Inc., United States, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. In the present book, we have put together the basic theory of the units and cuspidal divisor class group in the modular function fields, developed over the past few years. Let \mathbb{H} be the upper half plane, and N a positive integer. Let $\Gamma(N)$ be the subgroup of $SL(2, \mathbb{Z})$ consisting of those matrices $\begin{pmatrix} a & b \\ c & d \end{pmatrix}$ such that $a \equiv d \equiv 1 \pmod{N}$ and $b \equiv c \equiv 0 \pmod{N}$. Then $\mathbb{H}/\Gamma(N)$ is complex analytic isomorphic to an affine curve $Y(N)$, whose compactification is called the modular curve $X(N)$. The affine ring of regular functions on $Y(N)$ over \mathbb{C} is the integral closure of $\mathbb{C}[j]$ in the function field of $X(N)$ over \mathbb{C} . Here j is the classical modular function. However, for arithmetic applications, one considers the curve as defined over the cyclotomic field $\mathbb{Q}(\zeta_N)$ of N -th roots of unity, and one takes the integral closure either of $\mathbb{Q}(\zeta_N)[j]$ or $\mathbb{Z}(\zeta_N)[j]$, depending on how much arithmetic one wants to throw in. The units in these rings consist of those modular functions which have no zeros or poles in the upper half plane. The points of $X(N)$ which lie...

Reviews

This pdf is wonderful. It really is written in simple terms instead of hard to understand. It has been developed in an exceedingly simple way and it is just after I finished reading this ebook in which it in fact modified me, altered the way in my opinion.

-- **Ollie Powlowski**

This ebook is great. I am quite late in starting reading this one, but better than never. I am just easily going to get a satisfaction of reading through a composed pdf.
