BIOINFORMATICS ANALYSES OF EUKARYOTIC MRNAS AND INDUSTRIAL ENZYMES

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Untranslated regions of Eukaryotic mRNAs and Mechanism of action of Invertases, Fructosyl transferases and Pectinases | Bioinformatics programmes and genetic engineering techniques have become powerful tools to understand structure-function relationships of macromolecules. This monograph deals with the analyses of proteins and nucleic acids using these tools. The first paper describes development of a new software to analyze the untranslated regions in eukaryotic mRNAs. UTRScan utility has been used to analyze these regions...

Reviews

A brand new e book with an all new point of view. I have got read and i am sure that i am going to likely to read through once more once more in the future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Ms. Teagan Osinski III**

Extremely helpful for all class of folks. I really could comprehended almost everything using this written e publication. You will not feel monotony at at any time of the time (that's what catalogs are for about in the event you check with me).

-- **Prof. Melyna Dooley V**

The ebook is straightforward in study better to fully grasp. It is actually loaded with knowledge and wisdom I am just delighted to tell you that here is the best pdf i have read through during my very own lifestyle and may be he greatest ebook for at any time.
