Reviews

Unquestionably, this is actually the very best work by any article writer. It usually does not price a lot of. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Combining epistemological study with scientific research, hundreds of hints from the Quran are presented that collectively outline the image of a Super String based cyclic Universe, teeming with life and Intelligence at different levels of maturity, and unfolding according to an ultimate mother of all programs. The revelations seem to reveal the existence of traversable wormholes with multiple paths in the Universe, and a dynamic mechanism for administration of the universe. The concept of Creator, emerging from the literal translation of verses, covers not only this universe, but many more such universes, spread over levels upon levels of existence and perception. The most interesting aspect of this research is the identification of physical locations of Hell and Paradise, from the literal interpretation of verses. The revelations also reveal the existence of a Federation of Intellects in the universe, who are monitoring us for a long time. The research, thus, not only resolves the Fermis Paradox, but also presents an assessment of their technological capability as per Kardeshev scale and explains the difference between the fictional universe of Star Trek and our real universe. The research also asserts that man will outlive his planet of origin, surviving long in the universe; and resolves several difficulties in the standard model of scientists. The information presented is extensive; and its epistemological basis, transparent and consistent. Investigation and corroboration of hints, through a panel of experts, is likely to change our future in a way that would be beyond any science fiction authors dream. This item ships from La Vergne, TN. Paperback.
