Reviews

This pdf may be really worth a read, and superior to other. It generally does not price too much. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Createspace, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.In coming before the public with a newly made edition of my writings, what can I say to my reader at this stage of our acquaintance that will lead to a better understanding between us? Probably nothing. We understand each other very well already. I have offered myself as his guide to certain matters out of doors, and to a few matters indoor, and he has accepted me upon my own terms, and has, on the whole been better pleased with me than I had any reason to expect. For this I am duly grateful; why say more? Yet now that I am upon my feet, so as to speak, and palaver is the order, I will keep on a few minutes longer. It is now nearly a quarter of a century since my first book, Wake-Robin, was published. I have lived nearly as many years in the world as I had lived when I wrote its principal chapters. Other volumes have followed, and still others. When asked how many there are, I often have to stop and count them up. I suppose the mother of a large family does not have to count up her children to say how many there are. She sees their faces all before her. It is said of certain savage tribes who cannot count above five, and yet who own flocks and herds, that every native knows when he has got all his own cattle, not by counting, but by remembering each one individually.
