## Issues in Medical Research Ethics (Hardback)

By Jurgen Boomgaarden, Pekka Louhiala, Urban Wiesling

Berghahn Books, Incorporated, United States, 2003. Hardback. Condition: New. Language: English . Brand New Book. With medical advances, questions of medical ethics have become more urgent and are now considered of great social and political significance. An innovatively designed, activity-based workbook, this text was prepared using papers and case studies collected from several countries in the European Union. The problems they examine include the relationship between medical research and medical practice, elementary regulations of medical research, the complexity of informed consent, and the role of the sponsor or scientific community. These three books introduce key areas in current medical ethics to readers with no previous knowledge in the field. Structured around a variety of guided activities and real-life cases, the authors and cases represent a wide range of European backgrounds and professional disciplines, including medicine, bioethics, law, sociology, theology and philosophy. The general editor is Donna Dickenson, John Ferguson Professor at the University of Birmingham and Director of the Centre for the Study of Global Ethics. She is also the author of *Death, Dying and Bereavement* (Sage, 2000).
