Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Vocational Homemaking Education: Some Problems and Proposals The education of women and girls for the homemaking vocations has evolved to a point where many specific problems can be diagnosed. It is the purpose of this bulletin to state a few of these problems, to suggest some methods for their further study, and to submit certain tentative proposals for criticism. As far as practicable, the methods employed will be those being developed in educational sociology, namely, to base all proposed aims of education upon an analysis and evaluation of these needs of social groups to be realized in and through education, school and non-school. The standards will be those increasingly accepted in the general theory of vocational education. The bulletin is designed primarily for educators engaged in research in the fields of homemaking and household arts education, or in administering state and national legislation intended to promote such education. I. Problems for Consideration 1. Do we possess as yet any definitions of the homemaking vocations sufficiently specific and concrete to serve as foundations for the formulation of satisfactory programs of instruction and training for those vocations? Where can they be found? (It is obvious that definitions expressed only in vague general terms render very poor service.) 2. Back of definitions of homemaking, do we as yet possess analyses and classifications of homes sufficiently concrete to enable us to determine what are, for given social groups and conditions, optimum degrees of efficiency to be expected of homemakers?
