Instructors can choose the ideal combination of resources for their students: The text is known for its two-column example format that provides annotations to the left of the algebra. These annotations explain what the authors are about to do in each step (instead of what was just done), just as an instructor would do. Two MyMathLab(r) course options are now available: a standard course and a Ready to Go course. The Ready to Go option provides premade assignments for every section of the text. NEW! The Video Notebook is an unbound, three-hole punched workbook/note-taking guide that asks students to write down important definitions and procedures and work through key examples as they watch the Author in Action videos.
