STATISTICAL ANALYSIS OF NATURAL DISASTERS AND RELATED LOSSES

Springer. Paperback. Condition: New. 81 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. The study of disaster statistics and disaster occurrence is a complicated interdisciplinary field involving the interplay of new theoretical findings from several scientific fields like mathematics, physics, and computer science. Statistical studies on the mode of occurrence of natural disasters largely rely on fundamental findings in the statistics of rare events, which were derived in the 20th century. With regard to natural disasters, it is not so much the...
