Surgery of the Head (Classic Reprint) (Paperback)

By Louis Bathe Rawling

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Surgery of the Head The areas Supplied by the sensory nerves of the scalp are depicted in the accompanying figure. The occipito-frontalis possesses four small muscular bellies, two anterior arising from the supra-orbital ridge and two posterior from the superior curved line of the occipital bone, the four blending into an aponeurosis which is separated from the underlying bone by a plane of loose connective tissue - the sub aponeurotic tissue - the aponeurosis moving freely over the bone. It is along this loose layer that the scalp is torn away in scalp injuries. The aponeurosis thins off towards the sides of the head, blending with the temporal fascia and attached to the temporal ridges. Blood or pus may spread widely throughout the subaponeurotic space, limited in front by the orbital ridges, behind by the curved line of the occipital bone and laterally by the temporal crest. In all cases, however, the effusion, whether blood or pus, will tend to gravitate towards the more dependent part of the head, usually the occiput, there leading to marked boggiess with oedema and...
