GOAL-DIRECTED PROOF THEORY

[DOWNLOAD](#)

Book Condition: New. Publisher/Verlag: Springer Netherlands | Goal Directed Proof Theory presents a uniform and coherent methodology for automated deduction in non-classical logics, the relevance of which to computer science is now widely acknowledged. The methodology is based on goal-directed provability. It is a generalization of the logic programming style of deduction, and it is particularly favourable for proof search. The methodology is applied for the first time in a uniform way to a wide range of non-classical systems, covering intuitionistic, intermediate, modal and substructural logics. The book can also be used as an introduction to these logical systems from a procedural perspective. Readership: Computer scientists, mathematicians and philosophers, and anyone interested in the automation of reasoning based on non-classical logics. The book is suitable for self study, its only prerequisite being some elementary knowledge of logic and proof theory. | 1. Introduction. 2. Intuitionistic and Classical Logics. 3. Intermediate Logics. 4. Modal Logics of Strict Implication. 5. Substructural Logics. 6. Conclusions and Further Work. Bibliography. Index. | Format: Paperback | Language/Sprache: english | 268 pp.
