

## Design of an Integrated Process Chain to Support the Manufacturing of Ti6Al4V Components

Filesize: 4.92 MB

### **Reviews**

*It in a of the most popular ebook. I have got study and i am certain that i am going to likely to read again yet again in the future. I am happy to inform you that this is actually the greatest ebook i actually have study inside my very own life and might be he best ebook for possibly.*

## DESIGN OF AN INTEGRATED PROCESS CHAIN TO SUPPORT THE MANUFACTURING OF Ti6Al4V COMPONENTS

To read **Design of an Integrated Process Chain to Support the Manufacturing of Ti6Al4V Components** eBook, you should access the button listed below and save the file or have access to additional information that are in conjunction with DESIGN OF AN INTEGRATED PROCESS CHAIN TO SUPPORT THE MANUFACTURING OF Ti6Al4V COMPONENTS book.

Shaker Verlag Dez 2010, 2010. Taschenbuch. Book Condition: Neu. 208x146x20 mm. Neuware - Nowadays, the industry evolves towards the production of complex components with added value; most of them are made of materials with higher capabilities, such as the titanium alloys. Titanium alloys have attractive characteristics, e.g. high strength, low density and good corrosion resistance, which offer many potential applications. In the automotive industry, titanium alloys have been recently introduced with the aim of developing new vehicles with reduced weight, and thus optimized fuel consumption. In the aerospace industry, titanium alloys are currently the most used materials in aero engines, with a volume fraction of approximately 40%. On the one hand, the maturity in the aero engine design has been reached to a point where the manufacturers are focusing more on productivity, which implies the development of new technologies and processes, thus the development of new manufacturing strategies and new process chains. The introduction of materials with new capabilities represents challenges for the manufacturing technologies as these materials are difficult to machine. Their processes are defined and characterised only when knowledge and deep understanding about the material performance is available. And cost minimisation can take place when manufacturing knowledge is retrieved and reused in the process planning. On the other hand, more and more micro components and micro features have been introduced into diverse types of industrial products and market sectors. Micro components and micro features are used in the aerospace and automotive industry and for medical and biomedical applications. There are several micro manufacturing processes but they are quite limited to machine 3D free-form micro structures in a wide range of materials, mainly hard metals. Thus, a combination and integration of micro manufacturing processes is required. Thus, facing these challenges, the aim of this work is to design an...
