Although tensions were high during the Cold War, the current era has seen a new dimension to the tactical element of nuclear warfare; the ego. As tensions mount between the US, it allies, North Korea, China and even Russia, it looks increasingly likely that a nuclear strike is inevitable. Unfortunately, any strike launched by one party will be responded to by another; it is impossible to predict just how much damage could be done in the space of just a few minutes. But, despite the general feeling being one of doom and gloom, it is actually possible to survive a nuclear strike. Granted, this is highly unlikely if you are within a few miles of the strike point, but any further out and you have an excellent chance of survival; providing you start preparing now. This book will be your guide: Understand the potential threat and how it could become a reality. Discover what the likely scenario is if you are not prepared for this disaster and the best course of action you can take in this instance. Find out the crucial elements of any nuclear survival shelter and how to build a shelter in your back garden or basement.
