

## Imaging Appearances, Diagnosis & Treatment of Atypical Brain Abscesses

By Agyen-Mensah, Kwasi

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Imaging Appearances, A Guide to Making Prompt Diagnosis and Recommended Treatment of Atypical Brain Abscesses | Atypical brain abscesses like Tuberculous, Toxoplasmosis, Nocardia, Actinomyces and fungal brain abscesses mostly occur in immuno-compromised patients especially in various endemic regions of the world. The clinical features of such brain abscesses are mostly insidious and non-specific. The atypical and non-specific nature of the imaging appearances of these brain abscesses including Brain CT and MRI scans as well as other diagnostic difficulties can cause delays in making diagnoses but with the application of modalities like Diffusion Weighted Imaging (DWI) and MR Spectroscopy, atypical brain abscesses can be promptly differentiated from pyogenic bacterial brain abscesses, granulomas, brain tumours and from each other. Microbiological identification has also progressed with advances in molecular microbiology, nuclear medicine and immunology, making differentiation of the various causative organisms possible and more readily. Existing general poor outcomes can be improved if the clinician identifies positive risk factors and suggestive radiological appearances and institutes early appropriate therapy. | Format: Paperback | Language/Sprache: english | 56 pp.
