Reviews

It becomes an awesome publication that I actually have actually read. It really is written in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Talia Cormier)

INVESTIGATIONS ON THE USE OF SULPHUR AND ITS COMBINATIONS IN THE SUGAR HOUSE

To download **Investigations on the Use of Sulphur and Its Combinations in the Sugar House** PDF, make sure you access the web link below and download the document or have access to additional information which are relevant to INVESTIGATIONS ON THE USE OF SULPHUR AND ITS COMBINATIONS IN THE SUGAR HOUSE ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: .0051 0.032 0.038 0.003 9. 0.045 0.051 0.000-0.035 0.006 Experiments 1 to.6 confirm the results obtained in the sugar house. Whether we sulphur with 0.147 or with 0.243 per cent of sulphur dioxide, the sulphur dioxide in the clarified juice is the same, if we only lime back to the same acidity (0.109 and 0.108; 0.078 and 0.076; 0.051 and 0.059). The results also explain where the remainder of the sulphur goes. It is found in the precipitate. If we add up the SO₂ in the clarified juice to that in the precipitate we come very close to the total amount used in sulphitation; the rest has been lost by oxidation to sulphuric acid. The experiments furthermore confirm the results found before, that the clarified juice contains the more sulphur, the more acid we leave the juice after liming. The nearer we come to neutrality, the less sulphur we find in the clarified juice, and with neutrality itself we reach the minimum. Therefore, if we want to leave a minimum quantity of sulphur dioxide in our products, we have to lime our juices to as near neutrality as possible. The minimum quantity of sulphur that we can expect in the freshly treated clarified juice is, under these circumstances, about 0.055 per cent. If we use a quantity of sulphur which gives us just this amount of sulphur dioxide in the clarified juice, then practically no sulphur will be precipitated, even if we lime to neutrality. A...
