

Science-Gossip (Classic Reprint) (Paperback)

Filesize: 6 MB

Reviews

This is basically the finest publication i actually have go through till now. We have read and i also am confident that i am going to likely to read through again once more in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Prof. Adell Lubowitz)

Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Science-Gossip I think all the members of the family are vegetable feeders, and may be seen grabbing with the pack among Confervae and decaying water-weed. The mastax is also extruded on the ventral surface - there is a bend of the carapace for this purpose - and may sometimes be watched nibbling at the surface of a weed. The cilia as usual are used to create currents, bringing streams of sediment into the mouth, and in swimming. I kept the water by me, examining it from time to time, always finding fully grown individuals (figs. 9 and 10); but with these were other forms, smaller and of different outline. As time went on some Philodina made their appearance, the Metopidia decreased in size, then in number, until on the 7th of April, from a dip that would a month previously have produced hundreds, I could only find one, which is of the shape shown in figs. 7 and 8; also five or six Rotifer vulgaris, two or three Philodina citrina, and several Monostyla lunaris. I also found Callidina parasitica, which I was puzzled to account for till I observed an Assellus creeping among the decaying weed at the bottom of the jar on April 20th. The Callidina had left the body of the host, and in their independent state were certainly thriving and many in number. At first I was inclined to regard the various forms of Metopidia as different species, but watching the appearance of a young one from the egg (figs. 1 and 2), I was puzzled by its great difference in outline from the parent species, and by the presence of short spines at the base of...
