NEW METHODS OF FOOD PRESERVATION

Book Condition: New. Publisher/Verlag: Springer, Berlin | The major techniques employed for food preservation have a long history of use. They include chilling; freezing; drying; curing; canning; fermenting or otherwise acidifying; the addition of preservatives; heat pasteurization and sterilization. Newer techniques more or less derived from these traditional procedures include the successful application of combination preservation or 'hurdle' methods, vacuum- and modified atmosphere-packaging, and continuous sterilization coupled to aseptic packaging. More innovative techniques, such as the use of ionizing radiation,...
