BERRETT-KOEHLER, United States, 1999. Hardback. Condition: New. Language: English . Brand New Book. Supply chain management-the means by which firms engaged in creating, distributing, and selling products can join forces to establish a supply network with an unbeatable competitive advantage-has emerged as one of the most powerful business-improvement tools around. Firms that reach the fourth stage learn how to establish the external alliances necessary to build the essential networks. Poirier provides a model for building this advanced stage, including the construction of value chain constellations that deliver benefits that elude lower-level competitors and the implementation of communications Intranets, Internets, and privileged Extranets. He also includes action studies that illustrate what has...
