

Pediatric Airway: Cry, Stridor, and Cough (Hardback)

By -

Plural Publishing Inc, United States, 2008. Hardback. Condition: New. Language: English . Brand New Book. Drawing on 45 years study of pediatric laryngology, phoniatrics, and bronchology, this multidisciplinary book describes 42 different pathological sounds - occurring in different combinations - in 54 different pathological conditions. Uniquely, while recognizing the indispensability of conventional investigation methods - endoscopy, radiology, MRI - the Editors demonstrate the value of perceptive-auditive evaluation and objective acoustic analysis as a complimentary diagnostic tool. A major feature of the book is that the diagnostic evaluations are based on exactly determined parameters in terms of acoustics. It is wholly unique and features contributions from many of the world's leading specialists in the field. This book should be in the library of every ENT and Pediatric ENT department. With an accompanying DVD, they visually - through spectrograms, endoscopic photos, and radiologic or MRI pictures - and audibly demonstrate the acoustic characteristics of the pathological sound phenomena, the different irregular or unusual sounds occurring in, and the characteristic of each respiratory or neuro-developmental disease and disorder. Throughout, the editors demonstrate the value of this complimentary diagnostic and rehabilitation tool for airway obstructions and the various pathological and neuro-developmental anomalies in the...
