

Building a HIPAA-Compliant Cybersecurity Program: Using NIST 800-30 and CSF to Secure Protected Health Information (Paperback)

Filesize: 3.21 MB

Reviews

A top quality publication as well as the typeface used was intriguing to learn. Yes, it is play, still an amazing and interesting literature. I discovered this publication from my i and dad suggested this book to learn.

BUILDING A HIPAA-COMPLIANT CYBERSECURITY PROGRAM: USING NIST 800-30 AND CSF TO SECURE PROTECTED HEALTH INFORMATION (PAPERBACK)

[DOWNLOAD](#)

aPress, United States, 2017. Paperback. Condition: New. 1st ed.. Language: English . Brand New Book. Use this book to learn how to conduct a timely and thorough Risk Analysis and Assessment documenting all risks to the confidentiality, integrity, and availability of electronic Protected Health Information (ePHI), which is a key component of the HIPAA Security Rule. The requirement is a focus area for the Department of Health and Human Services (HHS) Office for Civil Rights (OCR) during breach investigations and compliance audits. This book lays out a plan for healthcare organizations of all types to successfully comply with these requirements and use the output to build upon the cybersecurity program. With the proliferation of cybersecurity breaches, the number of healthcare providers, payers, and business associates investigated by the OCR has risen significantly. It is not unusual for additional penalties to be levied when victims of breaches cannot demonstrate that an enterprise-wide risk assessment exists, comprehensive enough to document all of the risks to ePHI. Why is it that so many covered entities and business associates fail to comply with this fundamental safeguard? Building a HIPAA Compliant Cybersecurity Program cuts through the confusion and ambiguity of regulatory requirements and provides detailed guidance to help readers: Understand and document all known instances where patient data exist; Know what regulators want and expect from the risk analysis process; Assess and analyze the level of severity that each risk poses to ePHI; Focus on the beneficial outcomes of the process: understanding real risks, and optimizing deployment of resources and alignment with business objectives. What You'll Learn: Use NIST 800-30 to execute a risk analysis and assessment, which meets the expectations of regulators such as the Office for Civil Rights (OCR); Understand why this is not just a compliance exercise, but a way to take back control of protecting ePHI; Leverage...
