Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The loss of tooth in the esthetic area is often a traumatic experience for the patient. Patients may suffer real or perceived detrimental effects following the loss of one or more teeth. Dental implant offers the most cost-effective and long-term solution for replacement of missing teeth with high average life expectancy, providing the patient with the best sense of security and well-being. Recently, immediate implant placement after extraction of tooth with early loading has become more common. The advantages of this procedure include fewer surgical interventions, reduction in overall treatment time, reduced soft and hard tissue loss, and psychological satisfaction to the patient. There have been various controversies between immediate and delayed loading protocols and both of them are very well mentioned in the text giving more importance to the immediate loading protocols. | Format: Paperback | Language/Sprache: english | 76 pp.
