

Brain, Vision, and Artificial Intelligence: First International Symposium, Bvai 2005, Naples, Italy, October 19-21, 2005, Proceedings

Filesize: 2.1 MB

Reviews

It is simple in go through preferable to comprehend. It is full of wisdom and knowledge It is extremely difficult to leave it before concluding, once you begin to read the book.
(Leif Predovic)

BRAIN, VISION, AND ARTIFICIAL INTELLIGENCE: FIRST INTERNATIONAL SYMPOSIUM, BVAI 2005, NAPLES, ITALY, OCTOBER 19-21, 2005, PROCEEDINGS

DOWNLOAD PDF

Springer. Paperback. Condition: New. 556 pages. Dimensions: 9.2in. x 6.1in. x 1.3in. The 1st International Symposium on Brain, Vision and Artificial Intelligence (BVAI, Naples, Italy, October 19-21, 2005) was a multidisciplinary symposium aimed at gathering scientists involved in study of the Brain, Vision and Intelligence, from both the natural and artificial points of view. The underlying idea was that to advance in each of the above research topics, integration with and attention to others is necessary. The overall rationale of the BVAI symposium was based on a multidisciplinary approach of biophysics and neurobiology, visual and cognitive sciences and cybernetics, dealing with the interactions of natural and artificial systems. BVAI was conceived and organized by a group of researchers active in the BVAI topics of the Institute of Cybernetics E. Caianiello of the Italian National Research Council, Pozzuoli, Naples (ICIB-CNR), with the support of the Italian Institute for Philosophical Studies (IISF), and the help of the Macscopic Quantum Coherence and Computing Association (MQC2). BVAI was sponsored by the EBSA (European Biophysics Societies Association) which in particular provided travel grants for deserving young participants from outside Italy. The symposium was held under the auspices of the AIIA (Italian Association of Artificial Intelligence), GIRPR (Italian Group of Researchers in Pattern Recognition), SIBPA (Italian Society of Pure and Applied Biophysics) and SINS (Italian Society for Neurosciences). BVAI addressed the following main topics and subtopics: Brain Basics: neuroanatomy and physiology; development, plasticity and learning; synaptic, neuronal and neural network modelling. Natural Vision: visual neurosciences; mechanisms and model systems, visual perception, visual cognition. Artificial Vision: shape perception, shape analysis and recognition, shape understanding. Artificial Intelligence: hybrid intelligent systems, agents, cognitive models. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
